THE M.E.D.* TECHNOLOGY explores physiological, biochemical and energetic reactions to the stress adaptation response and teaches the body's holographic systems to move out of those reactions and create a new, healthy, and vital state of being.

- Discover the system Dr. Bartlett developed and practiced successfully before he created Matrix Energetics. A system he considers so highly effective that he continues to utilize it today.
- Examine how, why, and what the body does when it moves into stress response.
- Learn how M.E.D.* provides the holographic body a new strategy and a different reality.
- Learn how M.E.D.* addresses every condition and every system.
- No Prerequisite is required to attend this seminar. No particular background or experience or expertise is required.

Unfold new skillsets, deepen your understanding and ability to interact with the holographic templates of the body's structures and functions. Learn how to engage with precise energetic patterns and to then deliver specific corrections to the holographic body systems in order to access the pathways of the fight or flight stress response. Teach the body how to 'see' its patterns of biochemical, functional, and structural adaptations to the stress response and thus be able, with a little help, to heal itself!

M.E.D.* AND MHRT* are also being offered as stand alone seminars. There is no prerequisite for M.E.D.*. The prerequisite for MHRT* is previous attendance at a Magic or Unplugged: Spatial Clairvoyance seminar or M.E.D.* seminar.

MASTER HARMONIC RESONANCE TECHNOLOGY (MHRT)* is being offered as a stand-alone, 1-day seminar. PRE-REQUISITE is completed attendance at a Magic, Unplugged: Spatial Clairvoyance, or at the M.E.D.* seminar immediately preceding MHRT* in Seattle, July 11-12, 2015.

MASTER HARMONIC RESONANCE TECHNOLOGY

The Master Harmonic Resonance Technology (MHRT)* was developed by Dr. Richard Bartlett in a download that he received intuitively from his guides, or angels as they call themselves. This protocol is a complete system of healing designed to clear deep-seated energetic imbalances and harmonic interference patterns from the body's energy field clearing the way for a more complete healing to occur.

This class is taught by Dr. Richard Bartlett in a one-day intensive. The entire protocol will be taught utilizing a combination of lecture, Power Point, demonstration, and guided practice interaction for each part of the protocol. This step-by-step procedure is driven by the Matrix Energetics® process known as Windows and utilizes proprietary consciousness technology developed by Dr. Bartlett called Modules.

The Module technology, inspired by the chiropractic genius, Dr. M.L. Rees D.C., has been taught to Matrix Energetics® participants since 2003. The Module basic procedure has been taught to thousands of practitioners around the world by Dr. Richard Bartlett and Melissa Joy Jonsson. This new protocol synthesizes a complete procedural system for energetic correction of patterns of disorganized function into a comprehensive approach. This seminar may be taken by anyone regardless of their level of M.E.D.ical or healing training. This protocol will work on family, friends, and animals and is an excellent method that can be applied for self-healing. It also works very well as a Premier Distance Healing Methodology using a surrogate, such as an acupuncture model.

The Master Harmonic Resonance Technology seminar experience will consist of a series of discussion and demonstration sequences taught by Richard followed by 'hands-on' practice sessions throughout the course of the day. A detailed Power Point presentation will be featured, and a complete manual of the entire MHRT*Protocol will be provided to each participant.
